

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

AUG 10 1982

Mr. David Edwards
Litton Advanced Circuitry
P.O. Box 2847
Commercial Station
Springfield, Missouri 65803

Dear Mr. Edwards:

We have reviewed the revised closure plan dated August 4, 1982. We are approving this revised closure plan contingent upon the following conditions:

1. Missouri Department of Natural Resources (MDNR) requirements regarding capping the lagoon are met.
2. In addition to MDNR requirements on depth and type of cap, information should be provided to this office on the type of fill material and if soil from the berms will be decontaminated prior to use as fill material.
3. The allowable metal levels under Section 265.112 D. of the closure plan are approved. If it becomes necessary to change these numbers as a result of findings during the cleanup operation, new allowable levels will be developed by Litton, MDNR and the Environmental Protection Agency (EPA).

A public notice will be issued during the week of August 9, advising that closure activities are underway.

Any questions regarding this letter should be directed to Karen A. Flournoy at (816) 374-6531.

Sincerely yours,

Robert L. Morby
Chief, Waste Management Branch
Air and Waste Management Division
